COUNSELING SERVICES OF SOUTHERN MN | ST. PETER

Counseling Services of Southern Minnesota, located in St. Peter, MN, commissioned Brunton Architects & Engineers to design their new 6,700 s.f. building in early 2012. The design goal was to create an inviting, modern atmosphere using warm colors and genuine natural materials. Client privacy, security, and confidentiality were important issues, necessary accommodations were made through insulated walls and ceilings and interior file rooms.
